

**OPPORTUNITY: *Tell our Leaders to Give Citizens Credit.***

**A MANDATE FOR CONGRESSIONAL REPRESENTATIVES**

My representatives are to frame and pass legislation to grant credit to taxpayers, and to arrange ongoing support for private credit transactions by citizens. This credit shall be public tender for all debts, public or private. The management of this credit shall be at public expense, and shall be afforded like public protection as for the handling of printed or coined money.

Free revolving credit shall be provided to taxpayers for up to 20% of their past-year federal tax payment; and no private charge shall be allowed from taxpayers to have and maintain debt within this 20% limit. Federal taxing authorities shall have authority to collect or privatize any such credit in excess of 20% due to tax payments reduced from the previous year.

Legislation is to allow the Federal Government to enter into funded contracts with private credit providers to allow citizens to place their free credit upon a private credit card. Private credit providers shall not be able to charge card holders fees for credit within the free credit limits. The Legislation shall also permit the Government to enter into the credit card business so far as is necessary and convenient for issuing government credit vehicles to citizens. Citizens may add to any publicly provided credit limit through payment to the credit provider – which shall be add fee-free debit potential.

Legislation shall recognize the Government as first creditor should the citizen die or otherwise become incapable of paying credit amounts on publicly provided credit.
