

**OPPORTUNITY: *Tell Legislators to Require Corporate Performance Reporting.***

**A MANDATE FOR STATE & FEDERAL LEGISLATORS**

My representatives are to enact legislation to require all corporations to report regularly to investors and owners all corporate expenses and earnings without any division or reduction effecting the potential value gained by investors as owners. The reported measure shall include all potential corporate earnings per dollar invested. This report shall include a measure of total property value per dollar of investment, based on the whole property value of the corporation; and it shall include an estimate of in-process inventory.

This report shall include a management summary balance sheet showing major senior management decisions, with impact on both operating income and cost accomplished through those major management efforts. This shall include measures for impact on corporate earnings per investment dollar accomplished through these major management actions. Ongoing management efforts shall be reported on a per-year impact, and may include estimates for out years.

There shall be a structural balance sheet showing whole operating cost and income from sales broken down by type of product with separate line items for performance costs and internal support costs. Metrics shall provide owners and investors with contribution to cost and contribution to profit measures for each product line item. Contribution metrics shall also show contribution per dollar of investment.

After the first year, corporate management shall re-publish prior-year metrics to compare with current corporate performance reports.
